The goal of this certification is not only for the instructors to be able to execute the techniques but be able to teach and adapt the techniques in any given situation to any person no matter what physical condition or limitations that person might have. There will be a final test which will include a written test, a physical performance test and a teaching test. The instructors will have to attend the TRESPO seminar and be assistants.

Upon successful completion of the course, the instructors will receive a certificate of instruction and free conferencing with Combined Combatives, which is good for three years. Renewal is at the sole discretion of Combined Combatives.

## **SYNOPSIS:**

1. Six hour instructor certification for existing Defensive Tactics Instructors. The reason for existing DT instructors either for a department or privately is to have a basic set of skills so the class can be completed in six hours.
2. Instructors must assist in the seminar for course completion.
3. Certificates and course guidelines will be given.
